Multiplication & Division Fact Fluency

Multiplication and Division fact fluency practice will continue this week with a test Friday over the 5s, ie. 10×4 , 10×5 , $50 \div 10$, $10 \div 5$. Students will earn another part of a paper ice cream sundae if they master the 10s facts.

MATH We will focus on problem solving using all four operations: addition, subtraction, multiplication and division. Students will have to determine which operation or operations they need to use to solve a word problem. We'll also practice solving multi-step problems with various strategies.

Science & S.S.

Students will describe Earth's magnetic poles.
We will draw and describe a magnetic field.
Students will predict and describe how magnets attract and repel magnetic objects.

We will spell words with aw and au patterns such as taught, crawl, and daughter. We will also work on adding details to improve our stories.

Reading

We will begin a new novel study about the Tale of Despereaux by Kate DiCamillo. Students will make and confirm predictions with text evidence from this book. Students will also identify the theme of the text and determine the meaning of unfamiliar words using context clues.
